

Call it Creative – On Heidegger with Alain Badiou

By Lisa Semana

“A lot of debates on
Heidegger and in fact
his brilliance on
reminding people to be
ear to the ground like,
be more materialist,
more and more. If you
were materialist, you
would say, it
commences with

Heidegger. Be materialists with your newspaper – point out I am reading a newspaper, but yes it is by a company perhaps. It means though it is really a newspaper that matters. This is Marx as Heidegger. Being debated – and it says in fact Heidegger is brilliant to understand materialism – imagine documenting labour more closely, he is like

that. Marxists are busy ignoring labour or even what is called talking and styles of talking, and being in sports say. All of this means to re-read Heidegger with Newspapers – in fact – just add Heidegger to Call it Creative – and it debates if, Trotsky's history is really written at all, tout court.”

Slavoj Žižek –

Badiou jokes – is it a class and series and all that, or is it really people – is it the sky, the ground and people walking or is it class.

Badiou –

I mean it is class, but I also mean phenomenology, I mean

that. Have that bias.
Live well, fuck off.
